

WEBSITE DESIGN & CONTENT BLUEPRINT

A client-facing proposal for a credible, visual and impact-focused ARATTC website.

Prepared for ARATTC Management

Aboadi Rural Agricultural Technology Transfer Centre
Apremdo, Western Region, Ghana

Planning document - June 2026

Proposed structure, content, visual direction and media requirements for management approval.

1. Purpose of This Proposal

A practical guide showing how the ARATTC website can be structured, written and presented.

This document translates ARATTC's organizational profile, services and project experience into a proposed public website. It is intended for discussion with the owners and management before design and development begin.

The proposed website should prove three things immediately:

ARATTC is a legitimate organization; ARATTC has practical experience; and ARATTC creates visible impact in communities. The written content explains the work, while real photographs and short videos provide evidence.

What management is being asked to approve

- The overall positioning and tone of the website.
- The proposed pages and navigation menu.
- The information, sample text and calls to action on each page.
- The visual direction, colours and use of real field photographs.
- The media and organizational information ARATTC must provide before launch.

Proposed website outcome

A modern, mobile-friendly institutional website that is credible enough for development partners and government agencies, while remaining practical and approachable for farmers, communities, trainees and organizations seeking ARATTC services.

2. Website Positioning and Key Audiences

Recommended public positioning

SUGGESTED WEBSITE COPY

Practical solutions for stronger livelihoods and resilient communities

ARATTC is an agricultural, livelihood-development and rural-enterprise organization providing practical training, consultancy and community-based interventions in Ghana. We work with farmers, women, young people, institutions and development partners to build skills, improve productivity and create sustainable economic opportunities.

Primary audiences

Development partners & NGOs

Organizations seeking an experienced local implementation, training or technical partner.

Government & public institutions

Agencies requiring agricultural training, livelihood programmes, research, surveys or project delivery.

Private-sector organizations

Companies seeking community engagement, value-chain support, CSR delivery or capacity building.

Farmers, women & youth groups

Individuals and groups looking for practical training, enterprise support or production guidance.

Researchers, media & public

Researchers seeking local knowledge and visitors exploring ARATTC's work, leadership and impact.

Key messages to repeat across the website

- Practical, hands-on training rather than theory alone.
- Long experience in agriculture, extension, livelihood development and community engagement.
- Inclusive programmes for rural communities, women, youth and disadvantaged groups.
- Ability to work with development partners, government agencies and private-sector organizations.
- Evidence-based delivery through photographs, records, results and testimonials.

3. Proposed Website Structure

A clear navigation system with eight main pages and detailed subpages for programmes and projects.

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Home	Overview of ARATTC, core services, impact highlights, featured projects, leadership and partner trust signals.	Hero photo/video, project images	Explore / Contact
About Us	History, legal status, vision, mission, objectives, values, governance and institutional profile.	Team and office photographs	Meet the Team
What We Do	Main intervention areas and individual training/service pages.	One strong image per service	Request Training
Projects & Impact	Project case studies with partners, locations, activities, beneficiaries and results.	3-8 images per project	View Project
Gallery	Organized photographs and short videos filterable by activity.	Captioned photo/video library	View Media
Leadership & Team	Executive Director, board, technical team and areas of expertise.	Professional portraits	Contact Office
Partners	Partner categories, selected collaborations and responsible logo display.	Approved logos/project images	Partner With Us
News & Stories	Current activities, project updates, opportunities and beneficiary stories.	Feature image per article	Read Story
Contact	Address, map, phone, email, enquiry form, WhatsApp and contact categories.	Office/map image	Send Enquiry

Recommended main menu

Navigation

Home | About Us | What We Do | Projects & Impact | Gallery | News | Partners | Contact

Highlighted button: REQUEST TRAINING

4. Home Page Blueprint

The homepage should establish credibility within seconds and guide visitors to services, projects and contact options.

HOME PAGE - PROPOSED FLOW

1. Hero: strong training photograph or short video

Headline, one-sentence introduction and two clear action buttons.

2. Who We Are

Concise overview, registration year and location.

3. What We Do

Six visual service cards linked to detailed pages.

4. Impact in Numbers

Verified figures for people trained, communities reached and projects delivered.

5. Featured Projects

Three or four current or important programmes with real field photographs.

6. Leadership, Partners and Final Call to Action

Executive Director introduction, trusted partner logos and contact prompt.

Hero section

SUGGESTED WEBSITE COPY

Empowering communities through agriculture, skills and enterprise

ARATTC provides practical agricultural training, livelihood development, consultancy services and community-based programmes that help people build sustainable incomes and stronger communities.

Recommended buttons: [Explore Our Work](#) | [Partner With Us](#)

Recommended homepage sections

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Hero	One clear headline, short introduction and two actions. Avoid a long opening paragraph.	Wide training image or 8-15 second muted video	Explore / Partner
Who We Are	Short organizational introduction: non-governmental, non-profit, registered in 2019 with	Executive Director or team image	About ARATTC

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
	the Registrar General's Department, based in the Western Region.		
What We Do	Six visual cards: sustainable agriculture, livelihood skills, entrepreneurship, consultancy, climate resilience and community development.	Real activity photograph per card	View Services
Impact	Verified figures such as people trained, communities reached, women/youth supported and projects delivered.	Simple numbers/icons	Our Impact
Featured Work	Three or four recent or representative programmes with partner, location and short result.	Strong project images	Read Project
Leadership	Brief introduction to the Executive Director and organizational expertise.	Professional portrait	Meet Leadership
Partners	Approved logos or names with accurate wording about current/past collaboration.	Partner logos	View Partners
Final CTA	Invitation to request training, consultancy or partnership discussion.	Background image optional	Contact ARATTC

5. Home Page Content Examples

Short “Who We Are” introduction

SUGGESTED WEBSITE COPY

Experience rooted in communities

Aboadi Rural Agricultural Technology Transfer Centre (ARATTC) is a Ghanaian non-governmental, non-profit organization that delivers practical agricultural training, livelihood development, research and consultancy services. Our work supports farmers, women, young people and institutions with skills and solutions that improve productivity, resilience and economic opportunity.

Suggested service cards

Sustainable Agriculture

Climate-smart production, aquaculture, beekeeping, mushroom, snail, poultry, rabbit and grasscutter enterprises.

Livelihood Skills Training

Practical soap making, baking, gari processing and other income-generating skills for communities and groups.

Entrepreneurship Development

Enterprise formation, business development, market linkages and value-chain support.

Research & Consultancy

Feasibility studies, baseline surveys, project evaluation, farm planning, market analysis and monitoring.

Climate & Environment

Climate resilience, natural-resource livelihoods and sustainable agricultural practices.

Community Development

Inclusive programmes supporting women, youth, health, sanitation, local governance and citizen participation.

Suggested final call to action

SUGGESTED WEBSITE COPY

Let us build practical solutions together

Are you planning an agricultural training programme, livelihood intervention, community project or technical study? Speak with ARATTC about your objectives, target group and location.

Recommended buttons: Request Training | Discuss a Partnership

6. About Us Page

This page should answer who ARATTC is, why it exists, how it is governed and why visitors can trust it.

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Page intro	A concise institutional overview and statement of purpose.	Team or field photograph	Our Work
History	Founding story, milestones and growth into current intervention areas. Management should confirm the exact narrative.	Archive photos if available	View Projects
Legal profile	Full legal name, non-governmental non-profit status, Limited by Guarantee, registration year 2019 and other verified institutional details.	Certificate image optional	Contact Office
Vision & mission	Use the polished organizational-profile wording approved by management.	Subtle background image	None
Objectives	Sustainable development, rural livelihoods, climate-resilient agriculture, health and governance objectives.	Icons or activity images	What We Do
Core values	Professionalism, excellence, integrity, innovation, collaboration, commitment and transparency.	Simple icons	None
Governance	Seven-member Board of Directors, oversight role and leadership structure. Publish only confirmed names and portfolios.	Board portraits	Leadership

SUGGESTED WEBSITE COPY

About ARATTC

Aboadi Rural Agricultural Technology Transfer Centre (ARATTC) is a non-governmental, non-profit organization registered in 2019 with the Registrar General's Department. Based in Aprembo in Ghana's Western Region, ARATTC works with communities, institutions and development partners to strengthen agriculture, livelihoods, enterprise and resilience through practical training and technical support.

Trust information to display

- Legal name and status.
- Registration year and confirmed registration number.
- Tax, SSNIT and PPA details only where management wants them public.
- Office location, verified digital address, official phone numbers and email addresses.
- Leadership qualifications and relevant organizational experience.

7. What We Do Page

A visual service directory that helps visitors quickly identify the support or training they need.

Recommended service categories

Sustainable Agriculture & Food Security

Climate-smart vegetables, mushroom, snail, backyard farming, ruminants, poultry, beekeeping, aquaculture, rabbitry, grasscutter and related production.

Livelihood & Skills Training

Soap making, baking and confectionery, fortified gari processing, bead making and other practical income-generating activities.

Entrepreneurship & Economic Development

Women and youth livelihood training, enterprise formation, business development services, market linkages and access-to-finance support.

Research, M&E & Consultancy

Feasibility studies, baseline surveys, project evaluation, monitoring and evaluation, market analysis, financial modelling and farm planning.

Private Sector & Market Systems

Value-chain development, M4P approaches, supply-chain support and community engagement for companies and partners.

Environment & Community Development

Climate adaptation, natural-resource livelihoods, health and sanitation, gender inclusion, youth participation and local governance.

How the page should work

- Each category begins with a real photograph, a two-to-three sentence explanation and a list of activities.
- Important activities receive their own detailed page so visitors can understand the training and request it directly.
- Cards should link to related projects, photographs and news stories, creating proof of experience.
- A persistent Request Training button should open a simple enquiry form with service, location, group size and preferred date fields.

8. Individual Service and Training Pages

Every major training activity should have a consistent page that combines explanation with photographic evidence.

SERVICE / TRAINING PAGE - TEMPLATE

1. Service Hero

Example: Soap-Making Training, Beekeeping or Grasscutter Production.

2. What the Training Covers

Learning outcomes, target participants, duration and delivery method.

3. Practical Demonstration Gallery

Trainer demonstrating, participants practising and completed outputs.

4. Who Can Request This Service?

Communities, NGOs, companies, government agencies and institutions.

5. Related Projects + Request Training

Evidence of past delivery and a direct enquiry form.

Recommended content for each service page

- Service title and a strong photograph of ARATTC conducting the activity.
- A short explanation of the enterprise or skill and why it is valuable.
- What participants will learn, including practical modules and expected outcomes.
- Who the training is suitable for: communities, cooperatives, women/youth groups, institutions or companies.
- Possible delivery formats: demonstration, group training, site visit, technical assistance or consultancy.
- Real project examples, image gallery, trainer profile and related services.
- A direct Request This Training button and enquiry form.

Example: Soap-making training page

SUGGESTED WEBSITE COPY

Practical soap-making and enterprise training

ARATTC provides hands-on soap-making training designed to help individuals and groups understand production, safety, quality control, packaging and basic enterprise management. Sessions can be adapted for community groups, women and youth programmes, institutions and development projects.

9. Projects and Impact Page

Project stories should show what was delivered, for whom, with which partner and what changed.

PROJECT & IMPACT STORY - TEMPLATE

1. Project Title and Main Photograph

Partner, location, dates and beneficiary count shown clearly.

2. Challenge and Project Response

Why the intervention was needed and what ARATTC delivered.

3. Activities and Results

Training modules, outputs, outcomes and verified impact figures.

4. Photo / Video Story

A sequence of captioned photographs or short clips.

5. Testimonial and Related Work

Beneficiary voice, partner acknowledgement and similar projects.

Project listing page

The main Projects & Impact page should display filterable project cards by year, theme, partner and location. Each card should show a clear title, main image, partner, date and one measurable result.

Individual project case study

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Overview	Project title, partner/client, dates, location, ARATTC role and beneficiary count.	Main field image	Share / Enquire
Challenge	The need or problem the project responded to.	Context photograph	None
Response	Training, technical support, research or implementation activities delivered by ARATTC.	Activity photos	Related Service
Results	Verified outputs and outcomes. Separate numbers delivered from longer-term impact claims.	Infographic/numbers	None

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Media story	Captioned gallery and short videos showing the process and results.	3-8 images / clips	View Gallery
Voices	Approved testimonial from participant, partner or community leader.	Portrait optional	None

Example featured projects from the organizational profile

- Livelihood support for more than 400 farmers involving ruminants, soap making and beekeeping.
- Additional livelihood support focused on snail farming.
- Diversified livelihood training for 120 military personnel.
- Vegetable, grasscutter and fish-farming training.
- Alternative livelihood support for women through soap making and bakery activities.

Important

All project dates, beneficiary figures, client names, partner logos and claims should be confirmed by management before publication.

10. Gallery and Media Page

The gallery should be an organized visual record of ARATTC's work, not a random collection of photographs.

Suggested filters

Agricultural Production

Aquaculture, beekeeping, rabbitry, snail, mushroom, grasscutter, poultry, pig and vegetable production.

Livelihood Skills

Soap making, baking, gari processing, bead making and related enterprise training.

Community Outreach

Field visits, group discussions, demonstrations, consultations and beneficiary engagement.

Projects & Partners

Launches, monitoring visits, partner activities, institutional training and events.

Every media item should include

- A short descriptive caption.
- Activity or project name.
- Location and date where known.
- Partner name where appropriate and approved.
- Alternative text for accessibility.
- Confirmation that ARATTC has permission to publish identifiable people.

Video recommendation

Use short, muted MP4 or WebM clips for practical demonstrations. Avoid large GIF files because they are heavy, lower quality and can slow the site. Longer interviews or documentaries can be uploaded to YouTube and embedded.

Soap-making products

Baking and confectionery

Fortified gari processing

SUGGESTED WEBSITE COPY

Example caption

Participants take part in a practical soap-making session facilitated by ARATTC in the Western Region. The training covered safe production, basic quality control, packaging and enterprise opportunities.

11. Leadership and Team Page

Executive Director profile

SUGGESTED WEBSITE COPY

John Kwamina Gyimah - Founder and Executive Director

John Kwamina Gyimah is an agricultural extension and rural-development professional with more than 36 years of experience in research, extension, programme delivery and community development. His academic and professional background includes an MPhil in Agricultural Extension, a BSc in Agricultural Extension, postgraduate training in agricultural administration and participation in the Cochran Agricultural Fellowship Program in the United States.

Page sections

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Leadership intro	Short statement about governance, technical leadership and accountability.	Executive portrait	About ARATTC
Executive Director	Professional biography, qualifications and areas of experience.	Formal portrait + field image	Contact Office
Board	Confirmed board members, qualifications, roles and oversight responsibilities.	Consistent portraits	None
Technical team	Project coordination, crops, animal production, animal health, finance, value chains and M&E expertise.	Professional headshots	Our Expertise
Extended experts	A short note that additional specialists are engaged as projects require.	Optional group image	Partner With Us

Presentation standard

- Use consistent portraits with simple backgrounds and similar cropping.
- Keep biographies concise: approximately 80-150 words for senior leadership and 30-60 words for team members.
- Publish only confirmed names, roles, qualifications and current portfolios.
- Do not display blank positions or placeholder names on the live website.

12. Partners Page

This page should demonstrate experience without overstating current relationships.

Recommended partner categories

International & development partners

World Vision International, Rainforest Alliance, Cocoa Life, UNDP, Solidaridad, FAO, World Bank and other confirmed organizations.

Government institutions

MoFA, EPA, Ghana Enterprise Agency, Ghana Armed Forces and relevant local authorities.

Private sector

Benso Oil Palm Plantation, OLAM, Plantation Sofnaf Ghana, Mondelez and other confirmed collaborators or clients.

Community structures

District Assemblies, community-based organizations, cooperatives, farmer groups and local leaders.

Responsible wording

Recommended label

“Organizations ARATTC has worked with through selected projects and assignments.”

This wording is safer than presenting every past client as a current partner. Logos should only be used when permission or established usage is confirmed.

Partnership enquiry copy

SUGGESTED WEBSITE COPY

Partner with an experienced local organization

ARATTC collaborates with development organizations, public institutions, companies and community structures to design and deliver practical agricultural, livelihood and rural-development interventions. Contact us to discuss implementation, training, research or technical support.

13. News and Stories Page

Regular updates will make the website feel active, current and trustworthy.

Recommended content types

Project updates

Training sessions, field visits, milestones, launches and completed activities.

Beneficiary stories

Approved stories showing how skills or support were applied after training.

Agricultural guidance

Practical seasonal tips, production advice and enterprise education.

Opportunities

Upcoming training, calls for participation, partnerships and recruitment where applicable.

Organizational news

Events, new collaborations, awards, official visits and institutional updates.

Thought leadership

Short articles from ARATTC experts on rural enterprise, extension and climate resilience.

Article structure

- Clear title and publication date.
- One strong feature image.
- Short introduction answering what happened, where and why it matters.
- Three to six short paragraphs, with additional photographs where useful.
- Related service or project links.
- Author or organizational attribution.

SUGGESTED WEBSITE COPY

Example story headline

ARATTC delivers practical livelihood training for community participants in the Western Region

Posting one meaningful update each month is better than creating a news page that remains empty or outdated.

14. Contact Page

A simple, trustworthy contact experience for training, consultancy, partnership and general enquiries.

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Contact summary	Official organization name, main phone, email and office hours.	Office photograph	Call / Email
Office location	Verified physical address, GhanaPost GPS address and embedded map.	Map / office exterior	Get Directions
Enquiry form	Name, organization, phone/email, enquiry type, service, location, group size and message.	None	Send Enquiry
Quick contact	WhatsApp action for mobile visitors, with a professional pre-filled message.	WhatsApp icon	Chat
Contact person	Executive or administrative contact only if management wants direct details public.	Portrait optional	Contact

Recommended enquiry categories

- Request training
- Request consultancy or research
- Discuss a project partnership
- Invite ARATTC to an event
- Media enquiry
- General enquiry

Contact details requiring confirmation before launch

Management confirmation required

The supplied materials contain different telephone and address details. Management should approve one official public phone number, any secondary number, the exact office wording and the digital address. The banner shows WK-593-8281, while the organizational profile lists the digital address as pending.

15. Visual Design Direction

A modern institutional style connected to agriculture, communities and practical development.

					
Deep agricultural green	Primary green	Muted gold	Light natural green	Warm cream	Charcoal text
#173D2B	#2F6A46	#B79A45	#EAF2E8	#F7F4EC	#26332B

Design principles

Credible

Clean layout, consistent typography, verified information and clear institutional identity.

Human

Real trainers, participants and communities rather than generic agricultural stock photographs.

Practical

Straightforward navigation and obvious actions: request training, view projects or contact ARATTC.

Visual

Large photographs and short videos supported by concise text, captions and project facts.

Accessible

Readable text sizes, strong contrast, keyboard navigation, alternative text and mobile responsiveness.

Fast

Compressed images, modern video formats and careful loading so the site works well on mobile data.

Recommended look and feel

- Deep green for trust and agricultural identity.
- Light natural green and warm cream backgrounds for calm, readable sections.
- Muted gold accents for headings, dividers and premium institutional detail.
- Dark charcoal body text for readability.
- Large, consistently cropped photographs with restrained rounded corners.
- Subtle motion only; no distracting effects or auto-playing sound.

Avoid

Overcrowded pages, too many bright colours, long walls of text, stretched low-resolution images, generic stock photographs, heavy GIF files, excessive animations and unverified claims.

16. Photography and Video Content Plan

The website will depend heavily on real, organized and well-captioned media.

Minimum photo set for every activity

1. A wide image showing the training environment.
2. The trainer explaining or demonstrating the activity.
3. Participants practising the skill.
4. A close-up of equipment, crops, animals, ingredients or products.
5. A group photograph.
6. Completed products or visible project results.
7. A participant portrait or short approved testimonial.

Example: grasscutter production

Recommended images: housing or pens; feeding demonstration; safe animal handling; trainer explaining management; participants inspecting the facility; record-keeping or business discussion; and a group photograph.

Example: soap making

Recommended images: ingredients and safety briefing; measurement and mixing; moulding or finishing; packaging; completed products; participants holding outputs; and a short demonstration video.

Media standards

- Use the highest-resolution originals available; do not rely on screenshots from messaging apps where originals exist.
- Shoot both landscape images for website banners and portrait images for cards or social media.
- Record short stable video clips in good light, preferably 8-20 seconds per action.
- Obtain consent before publishing identifiable people, especially children or vulnerable participants.
- Keep a spreadsheet or folder naming system with activity, location, date, partner and photographer information.

17. Website Functionality and Content Management

Core visitor functions

Responsive browsing

The website should work cleanly on phones, tablets and computers.

Service enquiries

Visitors can request training or consultancy through a structured form.

Project discovery

Projects can be filtered by theme, year, partner or location.

Media gallery

Photographs and short videos can be filtered by activity.

Search & sharing

Visitors can search content and share project or news pages.

Maps & quick contact

Directions, click-to-call, email and WhatsApp actions are easy to use.

Content management system

The website should include a simple administration area so an authorized ARATTC representative or the website manager can update content without changing the code.

- Add and edit projects.
- Upload photographs, captions and short videos.
- Publish news or beneficiary stories.
- Add or update training services.
- Update team profiles and partner information.
- Edit contact details and approved impact figures.

Quality and protection

- Secure forms with spam protection.
- Automatic image optimization and backups.
- Analytics to understand visitor behaviour.
- Privacy notice and consent wording for contact forms.
- Role-based access for administrators.
- Basic SEO settings for titles, descriptions and social-sharing images.

18. Information and Assets ARATTC Must Provide

Development can begin with placeholders, but the website should not launch until important details are confirmed.

SECTION	CONTENT & PURPOSE	MEDIA	ACTION
Brand	Best available logo files, preferred colours, official organization name and any letterhead or certificates used for reference.	Logo / brand files	Confirm
Legal	Registration number, approved legal status wording, year 2019 confirmation and any details management wants publicly displayed.	Certificate optional	Confirm
Contact	One official primary phone, secondary phone if needed, email, physical address, digital address, office hours and map pin.	Office photo / map	Confirm
Leadership	Approved names, roles, qualifications, biographies and portraits for Executive Director, Board and staff.	Headshots	Provide
Services	Final list of training and consultancy services, descriptions, target groups and delivery formats.	Activity photos	Approve
Projects	Project title, partner/client, dates, location, role, beneficiary figure, activities, results and approved media.	Project gallery	Provide
Partners	Confirmed names, correct logos and whether the relationship is current or historical.	Logo files	Approve
Impact	Verified totals for trainees, communities, projects, women/youth and other public statistics.	Evidence / records	Verify
Media	Original photographs and videos organized by activity, project, location and date, with consent status.	Original files	Provide
Social	Official Facebook, YouTube, LinkedIn, Instagram or other accounts to link.	Account URLs	Confirm

19. Proposed Implementation Stages

A phased process will reduce rework and give management clear approval points.

Phase 1 - Approval & Content Collection

Management reviews this blueprint, confirms the sitemap and supplies missing organizational information, photographs and project records.

Phase 2 - Content Preparation

Website copy is drafted, media is organized, captions are written and all public claims are verified.

Phase 3 - Visual Design

Homepage and key page designs are prepared for review using the approved brand direction and real ARATTC imagery.

Phase 4 - Website Development

Approved designs are built into a responsive website with project, gallery, news, form and content-management functions.

Phase 5 - Review & Testing

Management checks every page; forms, links, mobile layouts, performance, spelling, permissions and contact details are tested.

Phase 6 - Launch & Handover

The website is connected to the domain, analytics and search tools, then administrators receive guidance for future updates.

Recommended approval decisions at the meeting

- Approve or revise the proposed page structure.
- Select the preferred website positioning and homepage headline.
- Confirm which services deserve individual pages.
- Identify the first five to ten projects to publish.
- Assign responsibility for supplying photographs, videos and missing details.
- Confirm who will approve final text and images before launch.

Recommended first release

Launch with complete, credible core pages and at least five strong project or training stories. Additional archives can be added after launch rather than delaying the website indefinitely.

20. Proposed Website Outcome

The final ARATTC website should feel established, active and trustworthy. Visitors should be able to understand the organization quickly, see real evidence of its work, explore services and projects, and contact the team without difficulty.

The central idea

Every important claim should be supported by a real photograph, project example, verified figure, partner record or human story.

Proposed website promise

SUGGESTED WEBSITE COPY

Practical knowledge. Stronger livelihoods. Resilient communities.

Through hands-on training, technical support and collaborative programmes, ARATTC helps people and institutions turn agricultural and livelihood opportunities into sustainable results.

Next step

Management reviews this proposal and marks sections to approve, remove or revise. Once the structure and required content are confirmed, the visual homepage concept and detailed website copy can be prepared for final approval before development.

Prepared as a website planning document for

ABOADI RURAL AGRICULTURAL TECHNOLOGY TRANSFER CENTRE (ARATTC)

Based on the organizational profile, banner materials and website-planning discussion supplied by ARATTC.
